ORDER FORM (Please print)

NAME	<input type="checkbox"/> Account No.	
FIRM	<input type="checkbox"/> Enclosed \$	
ADDRESS	<input type="checkbox"/> Visa	
	<input type="checkbox"/> Master Charge	
CITY	Expiry Date	
PROVINCE	Bank	
POSTAL CODE	Signature	

CATALOGUE NO.	TITLE	QTY.	PRICE	TOTAL
NR42-5/4E	The Solarium Primer		\$3.95	
NR42-6/2E	The Solarium Workbook		\$14.95	
NR42-5-1	Solar Heated Homes in Canada		\$1.50	
NR42-5-2	Corrosion Prevention in Solar Heating Systems		\$3.00	
NR42-6-1	An Assessment of Problems		\$4.75	

Orders must be prepaid by postal money order or cheque made to the order of the Receiver General for Canada and addressed to the Canadian Government Publishing Centre, Ottawa, Canada K1A 0S9.

Also available through authorized bookstore agents or your local bookseller. Add 20% to prices for books to be shipped outside Canada. Payable in Canadian Funds.

NRC SOLAR INFORMATION SERIES

Solar Heated Homes in Canada

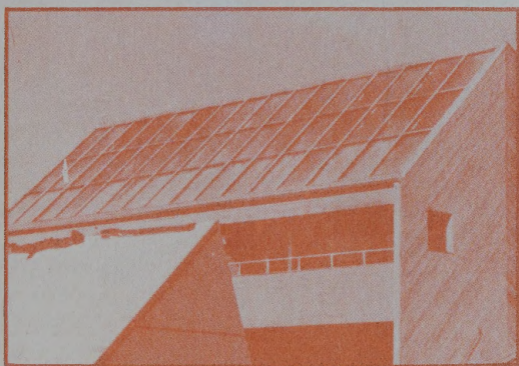

This introductory report in the Solar Information Series gives a short summary of the earliest phase in the testing of solar heating systems under Canadian conditions. Colour photographs and drawings. Bilingual.

Cat. No. NR42-5-1 24 pp. \$1.50

Corrosion Prevention in Solar Heating Systems

This report studies one of the more serious problems of solar energy systems: Corrosion. The sections of the study look at various aspects of the problem: an introduction to electrochemical corrosion, types of corrosion, internal and external corrosion, and an introduction to solar heating technology. Colour photographs. Figures. Appendices. Bibliography.

Cat. No. NR42-5-2 42 pp. \$3.00

SOLAR TECHNICAL SERIES

An Assessment of Problems Experienced With Presently Operating Solar Systems in Canada and the Northern United States

Because of the embryonic nature of the solar energy industry a field study is rare and extremely useful. This report summarizes the problems encountered in solar systems that have been operating for some time. Black and white photographs. Bibliography.

Cat. No. NR42-6-1 72 pp. \$4.75

The Solarium Primer

This primer is intended as an introduction to the subject of the solarium in Canada. It explains how the greenhouse effect can be used to make the solarium a net supplier of heat to the house. Some practical possibilities for the addition of a solarium are discussed so that the reader can make an initial assessment of the feasibility of a solarium at his own residence.

The primer is well illustrated and contains a bibliography of further references to the subject.

Cat. No. NR42-5/4E

\$3.95

The Solarium Workbook

This well-illustrated workbook leads the reader from the preliminary considerations to the design stage, to thermal and economic performance evaluations, to appropriate construction techniques. This workbook is ideal for the non-professional person with a serious interest in designing and building a solarium.

Cat. No. NR42-6/2E

\$14.95
